Summary

Frontend Developer with hands-on experience delivering 3 production web applications across full build cycles - from Figma design handoff through deployment on Netlify and Vercel. Proficient in React.js, JavaScript (ES6+), and Tailwind CSS, with a focus on reusable component architecture, responsive design, and clean, maintainable codebases. Experienced collaborating with backend developers and UI/UX designers in remote, cross-functional environments. Looking to join a product-focused team where I can apply and deepen my frontend expertise in a full-time engineering role.

Skills

Frontend: JavaScript (ES6+), HTML5, CSS3, React.js, Next.js, TypeScript, Tailwind CSS

State Management: React Hooks, React Context API, React Router

Tooling & Deployment: Git, Vite, npm, Netlify, Vercel, ESLint

Testing: Jest, React Testing Library

Design Collaboration: Figma-to-Code, Responsive / Mobile-First Design, Component Architecture

APIs: REST API, Fetch API

Experience

Angling Lines – Frontend Developer (Internship)

Prague, Czechia · Jan 2025 - Feb 2025

- Built the complete frontend for a 7-page fishing company website, collaborating directly with a backend developer to integrate UI components with application logic. Delivered 5 days ahead of deadline / within 4-week timeline.
- Designed and implemented responsive layouts and user flows across all pages, applying mobile-first CSS practices to ensure consistent cross-device compatibility. Delivered production-ready frontend within a defined project scope, managing async communication with a remote backend developer throughout the engagement.

Freelance Frontend Developer

Armenia · Nov 2024 - Dec 2024

- Delivered a complete designer portfolio from Figma handoff to live Netlify deployment in under 4 weeks - independently managing scoping, development, and deployment without backend support.
- Built with React.js and Tailwind CSS, achieving full responsiveness across mobile, tablet, and desktop breakpoints.
- Tested across Chrome, Firefox, Safari; achieved 90+ mobile Lighthouse score.

Futurest – Junior Frontend Developer (Freelance)

Czechia · Jul 2023 - Dec 2023

- Owned full frontend build cycle across two consecutive product versions - from design handoff to production deployment - using React.js, Tailwind CSS, and component-based architecture, delivering a library of ~20 reusable UI components. Used across 8 pages, reducing per-page build time by ~30%.
- Entrusted with sole ownership of the second iteration based on quality of first delivery; introduced improvements to component reusability and layout consistency that reduced redundant code across the application. Translated UI/UX specifications into modular, mobile-first React interfaces tested across major breakpoints.

Todo App – Junior Frontend Developer

Armenia · Apr 2023

Built a fully functional task manager with add, edit, complete, and delete functionality. Implemented localStorage for data persistence so tasks survive page refreshes — no backend or framework required.

NFT Landing Page – Junior Frontend Developer (Recreation)

Armenia · Mar 2023

Recreated a real-world NFT product landing page using vanilla HTML, CSS, and JavaScript - implementing responsive layouts, hover effects, animations, and smooth scroll interactions without any frameworks or libraries.
